## Hydrant and Valve Replacement Project

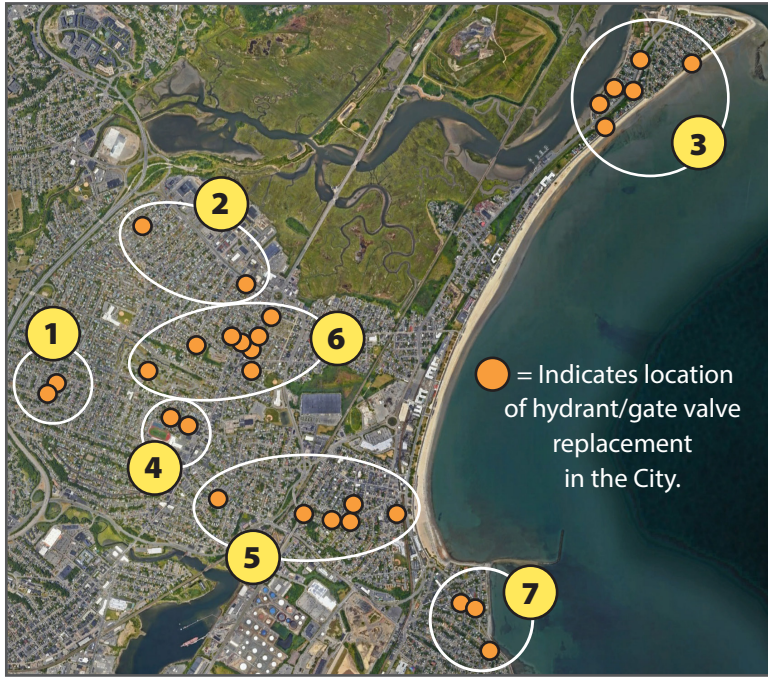

Construction Initiated October 2023

# The City of Revere Hydrant and Valve Replacement Project Overview

The Engineering Department and Department of Public Works identified the need to replace various aging hydrants and gate valves located throughout the City of Revere (City). A map depicting the approximate locations of these infrastructure replacements is provided. The goal of this project is to enhance the operation of the water distribution system. Before construction begins, the contractor will provide additional informational fliers to residents who will be affected by this work. The flier will outline all relevant and specific instructions.
