

Proteome Sciences plc (www.proteomics.com) is a global leader in applied proteomics and peptidomics with scientific operations based in Frankfurt am Main (Germany) and San Diego (CA, USA). We partner with innovative companies and academic research groups and offer high sensitivity, proprietary technologies for protein and peptide biomarker discovery, validation and assay development.

We are looking for a full-time lab-based

Associate Scientist or Technician Mass Spectrometry (m/f/d)

To support our Mass Spectrometry team based in our ISO9001:2015 certified facility in Frankfurt am Main.

As an Associate Scientist or Technician in the Mass Spectrometry Team, you will be involved in all client proteomics projects conducted in our laboratories, as well as in internal research and development efforts. You will be part of a highly collaborative team of scientists and contribute to our mission of bringing high quality proteomics analyses to an ever-growing international client base.

We strive to operate at the forefront of technology and routinely incorporate new technologies into our constantly expanding portfolio of services.

Key duties and responsibilities include:

- Daily operation, quality control and troubleshooting of mass spectrometry and liquid chromatography equipment in collaboration with other members of the MS team.
- Contributing to the development and implementation of LC-MS methods for discovery and targeted proteomics studies.
- Implementation of requirements and procedures in accordance with ISO9001:2015 and GCLP.
- Reviewing and creating new SOPs for the MS laboratory.
- Keeping lab records and management of lab stocks and purchasing.

Skills and Experience:

- BTA, CTA, MTA, M.Sc. / B.Sc. or comparable qualification with 2 -3 years of experience in biotech, pharmaceutical, or chemical industry.
- Hands-on experience and keen interest in operating and maintaining HPLC or LC-MS equipment are essential.
- Attention to detail and adherence to procedures.
- Good time management and prioritization skills, willingness to work in a team.
- Ability to communicate in written and spoken English and German.
- High level of computer literacy (Windows, Microsoft Office).
- Experience with lab automation or experience with scripting languages (Python, R) is a plus.
- Practical experience with proteomics is a plus.
- Experience working in a regulated environment (GLP, GMP) is an advantage.

What we offer:

- An opportunity for professional development at one of the market leaders in the area of applied proteomics, peptidomics and biomarker development.
- A competitive remuneration package commensurate with experience.
- Challenging projects in collaboration with leading industrial and academic partners.
- An international, friendly and welcoming working atmosphere.
- An attractive location in Frankfurt with good access to public transport and support of the Deutschlandticket.

We are an equal opportunity employer, and we value diversity. We comply with all applicable equal employment opportunity legislation and all employment is decided on the basis of qualifications and business need. Candidates must have the right to work in Germany and must be willing to relocate to the Frankfurt a. M. area. This job requires ability to lift standard lab equipment and supplies.
