Proteome Sciences plc (www.proteomics.com) is a global leader in applied proteomics and peptidomics with scientific operations in Frankfurt (Germany) & San Diego, California (USA). We partner with innovative companies and academic research groups and offer high sensitivity, proprietary technologies for protein and peptide biomarker discovery, validation and assay development.

We are looking for a highly motivated:

Laboratory Technician – Protein Analysis (m/f/d)

to support our Mass Spectrometry team based in San Diego, California.

As a Laboratory Technician / Research Associate, you will be involved in all client proteomics projects conducted in our laboratories, as well as in internal research and development efforts. You will be part of a highly collaborative team of scientists and contribute to our mission of bringing high quality proteomics analyses to an ever-growing international client base.
We strive to operate at the forefront of technology and routinely incorporate new technologies into our constantly expanding portfolio of services.

Your Responsibilities:

- Preparation and processing of samples for proteomics/mass spectrometric analyses as part of varied and exciting client projects and internal research projects.
- Application of biochemical methods for protein analysis (e.g., photometric measurements, gel electrophoresis, HPLC, protein depletion, enzymatic digestion, tissue lysis, etc.).
- Application of biochemical methods for processing and “labeling” proteins and peptides with multiplexing tags would be beneficial.
- Application of antibody-based methods for protein analysis (immunoprecipitation, antibody labeling, ELISA, MSD).
- Participation in improving existing and developing new preparation and processing methods for protein samples of all kinds.
- Assisting with everyday laboratory organization and setup under GxP requirements would be beneficial.

Your Profile:

- Successfully completed **(Bachelor or Masters Degree)** in biology or a related field with minimally 2 years of experience and interest in practical laboratory work.
- Initial knowledge and experience with the above-mentioned protein analytical methods.
- Experience handling **animal or human tissue samples, cells, blood plasma, or cell cultures**.
- Careful, scientifically accurate working and documentation practices, as well as a strong sense of responsibility and quality-oriented work.
- Commitment and enjoyment of working in a team.

Why Proteome Sciences?

- An opportunity for professional development at one of the market leaders in the area of applied proteomics, peptidomics and biomarker development.
- A competitive remuneration package commensurate with experience.
- Challenging projects in collaboration with leading industrial and academic partners.
- Flat hierarchies and an open-minded company structure, where your voice will be heard and you can put your ideas into practice.
- An attractive location in the Sorrento Valley in San Diego.

We are an equal opportunity employer and we value diversity. We comply with all applicable equal employment opportunity legislation and all employment is decided on the basis of qualifications and business need. Candidates need to have the right to work permanently in the USA and must be based in the San Diego area.

The annual salary range for this position is: $60,000.00 - $90,000.00. Proteome Sciences considers a variety of factors when determining base compensation, including experience, qualifications, and geographic location. These considerations mean actual compensation will vary. This position will be eligible for paid time off and a benefits package. Benefits include company-sponsored medical, dental, vision, and life insurance plans.
