## **Proteome Sciences plc**

### **("Proteome Sciences" or the "Company")**

#### **Trading Update and Notice of Results**

Following the Company's announcement on 25 January 2021 the Company has been progressing the year end audit and anticipates being able to announce the 2020 full year results on Thursday, 1 April 2021. The Directors of Proteome Sciences are pleased to announce that the Company now expects to report profit after tax materially higher than announced on 25 January. This is primarily due to higher than expected royalty receipts from Thermo Scientific for the last quarter of 2020. The annual results are still subject to finalisation of the audit and approval by the Board.

The Directors of Proteome Sciences look forward to updating shareholders on the Company's performance at the time of announcing the full results.

##### **About Proteome Sciences plc. ([www.proteomics.com](http://www.proteomics.com))**

Proteome Sciences plc is a specialist provider of contract proteomics services to enable drug discovery, development and biomarker identification, and employs proprietary workflows for the optimum analysis of tissues, cells and body fluids. SysQuant® and TMT®MS2 are unbiased methods for identifying and contextualising new targets and defining mechanisms of biological activity, while analysis using Super-Depletion and TMTcalibrator™ provides access to over 8,500 circulating plasma proteins for the discovery of disease-related biomarkers. Targeted assay development using mass spectrometry delivers high sensitivity, interference-free biomarker analyses in situations where standard ELISA assays are not available.

The Company has its headquarters in London, UK, with laboratory facilities in Frankfurt, Germany.
