## KITCHEN / CAFETERIA USE:

It is the philosophy of RSU 9 that the building Principal is responsible to the Superintendent for every aspect of operation of any school to which they are assigned. It is understood, however, the School Nutrition Director shall be responsible to the Superintendent for the operation of the program, even though the program functions under the responsibility of the Principal. It is thus expected that the Principal and the School Nutrition Director will work closely with all programs involving school lunch. And any changes in procedure or in routine will be discussed between them before it is implemented.

**It is policy of RSU 9 that when any outside group wishes to use a school lunch facility the application shall be made to the RSU 9 Support Services office. This office is then responsible to notify the Principal and School Nutrition Director, and to coordinate the program.**

For use of school lunch facilities within the school by school employed personnel, the request shall be sent to the school Principal who shall coordinate the requested activity with the Support Services office shall be consulted.

Unless special circumstances exist, there shall be a member of the school lunch staff present when non-school personnel use the kitchen.

All non-school lunch personnel using school lunch facilities shall be informed of the regulations pertaining to the facility and to federal school lunch commodities.
