

RSU 9 TRANSPORTATION UPDATE

December 2022.

Richard Joseph Jr

Director of Transportation and Custodial Services

Bus drivers, custodians, bus aides, mechanics and maintenance attended the CPR, FIRST AID, AED Certification & Training held on the October 7th Workshop.

Craig Smith & Steve Heath

Nancy Richardson & Val Floyd

We will be doing additional training on the March 17th workshop for the remainder of our staff. Certification is for two years.

School Bus driver appreciation day was celebrated on October 21st with a buffet of food provided by the district for the drivers after their bus runs. Special thanks to the district and Chef Andy and his team. The food and presentation was awesome.

District logo swag (Pullover shirt) to wear was also handed out to the drivers, custodians, aides, mechanics and maintenance.

An additional 1000 gallon tank was added to keep up with the usage of our 19 propane buses. Think clean.

Andrea Wing & Susie Balsamo-Monk

Supply issues continue but we are able to order and receive parts. Having the same manufacturer, Bluebird, we have been able to keep parts on the shelf and use them as needed. We have two programs, Foster Tech & Special Ed waiting on buses that were ordered in May. Waiting for GM to release the chassis and Ford will start production again in 2024.
