## Graduate Education Certificate Programs

### Certificate in Administration

Designed for practicing educators interested in pursuing opportunities in school administration. Two years of teaching experience is required to enroll in this certificate program.

### Certificate in English Language Learning

Designed for practicing educators interested in pursuing opportunities in teaching English language learners.

### Certificate in Gifted and Talented Education

Designed for practicing educators interested in pursuing opportunities in teaching gifted and talented students.

### Certificate in Math Intervention Specialist

Designed to prepare K-12 teachers to identify students who need assistance in mathematics.

### Certificate in Math Leadership

Designed for practicing educators interested in pursuing opportunities in mathematics leadership.

### Certificate in Special Education - Elementary

Designed for practicing educators who wish to increase their knowledge and expertise in special education for elementary school students.

### Certificate in Special Education - Secondary

Designed for practicing educators who wish to increase their knowledge and expertise in special education for middle and secondary school students.

### Certificate in Special Education Administration

Designed for practicing educators interested in pursuing opportunities in Special Education Administration.

### Certificate in Systems of Student Support

Designed to provide educational leaders with the opportunity to develop knowledge, skills, and competencies that can prepare them to assume leadership roles in the development and implementation of student support services and related programming in their schools and districts.

### Certificate in Mathematics Coaching

Designed to prepare K-12 teachers who wish to support other educators in their district on mathematics learning and teaching. Emphasis will be placed on identifying and implementing a coaching practice that aligns with the participants' context. In addition to examining approaches to working with adult learners, students will develop a deeper understanding of mathematics pedagogy in both research and practice
